There have been occasional reports of 'possible' reptilian hominoids masquerading as human-like beings, such as the 'alien' described on p. 109 of John Keel's book 'THE MOTHMAN PROPHECIES':

"I am an amateur herpetologist and once kept three-fanged cobras in my New York apartment... until my concerned neighbors squealed to the Board of Health. SOME OF THE DESCRIPTIONS OF THE ENTITIES IMPRESSED ME AS RESEMBLING SOME KIND OF REPTILE RATHER THAN HUMAN MAMMALS. I didn't mention the reptile notion to anyone. But on July 24, Lia (an alleged alien tied-in with the Men In Black) visited Jane (a contactee) and refused to talk about anything but eggs. She took some eggs from Jane's refrigerator and sucked out the contents like a reptile! Jane was perplexed by this exhibition and called me soon afterward."

And on pp. 176-177 of Signet's 1975 paperback edition of 'MOTHMEN', in reference to this same 'contactee', Keel states:

"...Meanwhile, Jane's phantom friends were visiting her daily and helpfully giving her surprising information about my own 'secret' investigations. My interview with the Christiansens of Cape May, and the details of their pill-popping visitor, Tiny, was then known only to a few trusted people like Ivan Sanderson. But on June 12, Mr. Apol and his friends (including the being that called itself 'Lia', referred to above - Branton) visited Jane when she was alone in her house and asked for water so they could take some pills. Then they presented her with three of the same

pills, told her to take one at that moment, and to take one other in two days. The third pill, they said, was for her to analyze to assure herself it was harmless. They undoubtedly knew she would turn it over to me. Two hours after she took the first pill she came down with a blinding headache, her eyes became bloodshot, and her vision in her right eye was affected. When her parents came home they expressed concern because her eyes were glassy and her right eye seemed to have a cast. The sample pill proved to be a SULFA DRUG normally prescribed for infections of the urinary tract..."
